3. Open the Web site in the browser, and print all the pages of the Web site.

Ex5A-7. Run the script file outdoorDB_v4.sql to load the Outdoor Clubs & Product database tables necessary to complete this exercise. Create a Web site titled "Outdoor Activities" to provide membership in sporting clubs and order outdoor supplies. The hierarchical site layout is shown on the right.

1. The Home page will have the following text.

> Outdoor activities can range from simple hiking to mountain climbing. Such activities require different equipments and supplies to enhance their enjoyment.
>
> We thank you for your visit. Please use the link buttons on the side to explore the site.

2. Position an appropriate image on the right of the above text in the Home page. (optional)

3. Create the additional Web pages titled Join Club, and Buy Supplies.

4. Create a procedure Ex5a7a that displays the output of the following queries.
    a. Compute the number of mountain clubs in the database.
    b. List the names of mountain clubs.

5. Use the queries created in requirement 4 to complete the following text for the Join Club page.

> ## Club Membership
>
> We offer membership to many existing sporting clubs. Currently there are *club_number1* sporting clubs attached to this Site. The fee for membership is $50 per month. The listed sporting clubs are:
> - *club_name1*
> - *club_name2*
>   .
>   .
>
> We welcome new membership. Use the Apply button to join any club.

Note:
- The *club_number1* will be a database value based on query (a) of requirement (4) above.
- The *club_name1, club_name2, ...* will be database values based on query (b) of requirement (4) above.
